Static Three-phase Multi-function Watt-hour Meter Series

Primary products of DTSD178/DSSD178/DTSD179/DSSD179 series are shown below:

Other types are available at the request of the user.
Features

- Low power consumption design, power consumption in a circuit is less than 1W, 2VA
- A switching power supply, wide-voltage power supply (0.5~1.3 rated voltage)
- High ability to sustain overvoltage, the upper limit of the input line voltage of all the products is 200V(AC)
- Careful design of hardware and software for reliability, the ability of self-diagnostics is high.
- High speed AC sampling with high precision that ensures the reliable measurement of electric energy.
- Measurement, storage and display for active and reactive energy in both directions, with four quadrant reactive energy and maximum demand and occurrence times, etc.
- Reliable measurement of the voltage, current, active & reactive power, power factors and apparent power of the tree phases in real time.
- Recording events such as missing voltage, phase break, Max & Min voltage, Max & Min power factor, voltage allowance rate, settings, clear energy, clear demand, system alarm etc.
- Time-of-Use metering, maximum 9 tariff rates, 12 time zone, 10 time segments tables and 12 time segments in a day.
- The display contains a continuous loop display and key press switch display which can be set by the user.
- Copies meter data backup during power failure with built-in battery, wake up by key press or remote control (optional).
- Maximum two outputs of overload alarms (optional).
- Load profile (optional).
- Providing RS485, RS232 and local optical port, the communication speed can be set between 1200bps and 4800bps, supporting local and remote maintenance and reading, with the possibility of using 2 RS485 ports.
- Remote communication is in accordance with DL/T 645-1997 and IEC 1107 data transport protocol, facilitating connection to metering devices of other vendors.
- IP communication with GPRS (optional).
- Integrated clock and calendar, automatic leap year compensation, accuracy less than 0.5 sec/day, time calibrated through the network.
- Temperatur Range:
  - Operating: -20° C ~ + 55° C
  - Limited: -30° C ~ + 60° C
  - Storage: -35° C ~ + 70° C
- Housing = protection against tampering, smaller volume, Dimensions: (248 x 175 x 70 mm), Weight: about 1.5 kg.
